

Aditya Singh

MERN Stack Developer

aditya031997@gmail.com | +91-8146724743 | Mohali, India | [linkedin.com/in/aditya-singh8146](https://www.linkedin.com/in/aditya-singh8146)

PROFESSIONAL SUMMARY

Experienced MERN Stack Developer with 4+ years of expertise building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in Next.js, Redux state management, PostgreSQL database design, and RESTful API development. Skilled in AI voice integrations (ElevenLabs), JWT-based authentication, agile development workflows, and version control using Git/GitHub. Passionate about writing clean, maintainable code and delivering responsive, user-centric solutions.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, Nest.js, RESTful APIs, JWT Authentication, bcrypt

Databases: MongoDB, PostgreSQL

Tools & Others: Git, GitHub, VS Code, Postman, npm, yarn, Agile/Scrum

AI & Voice: ElevenLabs (Text-to-Speech API), AI API Integration

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Eminence Technology | Mohali, India

January 2022 – Present

- Developed and maintained 10+ full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering high-performance, scalable solutions across diverse client domains.
- Built responsive React.js user interfaces for 5+ client projects, ensuring high component reusability, clean code practices, and consistent cross-browser compatibility.
- Designed and implemented secure RESTful APIs using Node.js and Express.js, handling 10,000+ daily requests with 99.9% uptime.
- Implemented JWT and bcrypt-based user authentication systems, ensuring data protection compliance and reducing unauthorized access incidents to zero.
- Designed efficient database schemas in MongoDB and PostgreSQL, leveraging indexing and schema normalization to ensure optimized query performance at scale.
- Collaborated in agile development environments using Git/GitHub for version control, contributing to 3+ concurrent projects with cross-functional teams.

PROJECTS

AI-Powered Virtual Receptionist System

AI Voice Receptionist with Smart Escalation & Support Ticketing | July 2024 – Present

Built a full-stack AI-powered Virtual Receptionist System for SmartCaller that autonomously handles all incoming calls 24/7, resolves user queries in real time, and shares relevant information to the caller’s email on request. When an agent cannot resolve a query, the system seamlessly transfers the call to a human agent. If no human agent is available, it collects the caller’s details and issue summary, then automatically forwards a complete support ticket—including the full call transcript and user query—to the support team for follow-up. Integrated ElevenLabs for natural voice synthesis to deliver a human-like caller experience.

Digital Language Assessment Platform

Teacher-Student Interactive Assessment Platform with Real-time Feedback | August 2024 – January 2025

Built a comprehensive MERN stack web application for Japanese and Chinese language learning, supporting dual roles for teachers and students. Delivered real-time feedback mechanisms, assessment management tools, and interactive exercises for 200+ active users.

EDUCATION

B.Tech — Computer Science Engineering

GNA University | Phagwara, India | July 2016 – July 2020

Senior Secondary (Class XII)

T.W.E. Isr. Sec. School | Phagwara, India | April 2015 – May 2016

Secondary (Class X)

T.W.E. Isr. Sec. School | Phagwara, India | April 2013 – April 2014

LANGUAGES

English | Hindi | Punjabi
