PROFESSIONAL SUMMARY

Full Stack Developer with 4.8 years of hands-on experience building full-stack applications using Node.js, Express.js, React.js, MongoDB, and MySQL. Proficient in REST API development, third-party integrations, JWT-based authentication, and database design. Experienced in deploying applications on AWS (EC2) with Nginx and PM2, and in building CI/CD pipelines with GitHub Actions. Strong problem-solving and communication skills, able to work independently and with cross-functional teams, with 10+ production applications delivered across client projects.

PROFESSIONAL EXPERIENCE

Full Stack Developer (MERN Stack) <i>Eminence Technology</i>	01/2022 – Present Mohali, India
- Developed and maintained 10+ full-stack web applications using Node.js, Express.js, React.js, and MongoDB across 5+ client projects, from development through production deployment. - Built secure REST APIs and third-party integrations using Node.js and Express.js with JWT-based authentication, scaling to support 10,000+ daily requests in production. - Designed database schemas across MongoDB and MySQL, applying indexing and query optimization, and troubleshooted production issues across live applications. - Built responsive, reusable React.js UI components integrated with REST APIs, handling errors gracefully. - Deployed and hosted applications on AWS EC2 with Ubuntu, Nginx reverse proxy, and PM2, and built CI/CD pipelines with GitHub Actions for automated, branch-restricted deployments via SSH. - Used Git/GitHub for collaborative development across 3+ concurrent projects, working directly with cross-functional teams and clients.	

EDUCATION

B.Tech — Computer Science Engineering <i>GNA University — Phagwara, India</i>	07/2016 – 07/2020
Senior Secondary (Class XII) <i>T.W.E. Isr. Sec. School — Phagwara, India</i>	04/2015 – 05/2016
Secondary (Class X) <i>T.W.E. Isr. Sec. School — Phagwara, India</i>	04/2013 – 04/2014

TECHNICAL SKILLS

Full Stack: Node.js, Express.js, React.js (Hooks, Context API, Redux), Next.js, MongoDB, MySQL
Cloud & Deployment: AWS EC2, Ubuntu Server, Nginx (Reverse Proxy), PM2, Deployment Automation
CI/CD: GitHub Actions (Workflows, Secrets, SSH Deployment, Branch-based Pipelines)
Version Control: Git, GitHub, Bitbucket
Backend: REST APIs, Third-party Integrations, JWT/OAuth, Middleware, Async Programming, Socket.io, Nest.js
Databases: MongoDB, MySQL (Schema Design, Indexing, Query Optimization)
Frontend: JavaScript (ES6+), HTML5, CSS3, Redux, Bootstrap
Tools & Others: Postman, VS Code, npm, yarn, Payload CMS (Headless CMS)

PROJECTS

Football Prediction & Betting Insights Platform

07/2026 – Present

SEO-Optimized Prediction Website with Headless CMS Blog

Built the backend and content infrastructure for a football prediction platform, integrating Payload CMS (headless) to power the blog — configuring content collections, a draft-and-publish workflow, a rich-text editor and media uploads on a dedicated database. Implemented server-side rendering/ISR logic and supported high-traffic page delivery for thousands of programmatically generated pages for matches, leagues, countries and betting markets.

AI-Powered Virtual Receptionist System

07/2025 – 06/2026

AI Voice Receptionist with Smart Escalation & Support Ticketing

Built the backend logic for an AI-powered Virtual Receptionist System for SmartCaller that autonomously handles all incoming calls 24/7, resolves user queries in real time, and shares relevant information to the caller's email on request. Designed the escalation flow that transfers unresolved calls to a human agent, and the fallback flow that collects caller details and automatically generates a complete support ticket — including the full call transcript and user query — for the support team.

Digital Language Assessment Platform

10/2024 – 06/2025

Teacher-Student Interactive Assessment Platform with Real-time Feedback

Built the backend and API layer for a full-stack web application for Japanese and Chinese language learning, supporting dual roles for teachers and students. Built the real-time feedback mechanisms, assessment management logic, and data models behind the interactive exercises, then completed and handed over the platform to the client.
