PROFESSIONAL SUMMARY

Experienced MERN Stack Developer with 4+ years of expertise building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in Next.js, Redux state management, PostgreSQL database design, and RESTful API development. Skilled in AI voice integrations (ElevenLabs), JWT-based authentication, agile development workflows, and version control using Git/GitHub. Passionate about writing clean, maintainable code and delivering responsive, user-centric solutions.

PROFESSIONAL EXPERIENCE

MERN Stack Developer

01/2022 – Present

Eminence Technology

Mohali, India

- Developed and maintained 10+ full-stack web applications and reusable React.js UI components across 5+ client projects using the MERN stack, ensuring cross-browser compatibility and high code reusability.
- Designed and implemented secure RESTful APIs using Node.js and Express.js, handling 10,000+ daily requests with 99.9% uptime.
- Implemented JWT and bcrypt-based user authentication systems, ensuring data protection compliance and reducing unauthorized access incidents to zero.
- Designed efficient database schemas in MongoDB and PostgreSQL, leveraging indexing and schema normalization to ensure optimized query performance at scale.
- Collaborated in agile development environments using Git/GitHub for version control, contributing to 3+ concurrent projects with cross-functional teams.

EDUCATION

B.Tech — Computer Science Engineering

07/2016 – 07/2020

GNA University — Phagwara, India

Senior Secondary (Class XII)

04/2015 – 05/2016

T.W.E. Isr. Sec. School — Phagwara, India

Secondary (Class X)

04/2013 – 04/2014

T.W.E. Isr. Sec. School — Phagwara, India

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, JavaScript (ES6+), HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, Nest.js, RESTful APIs, JWT Authentication, bcrypt

Databases: MongoDB, PostgreSQL

AI & Voice: ElevenLabs (Text-to-Speech API), AI API Integration

CMS: Payload CMS (Headless)

Tools & Others: Git, GitHub, VS Code, Postman, npm, yarn, Agile/Scrum

PROJECTS

Football Prediction & Betting Insights Platform

07/2026 – Present

SEO-Optimized Prediction Website with Headless CMS Blog

Built the public-facing frontend of a football prediction platform using Next.js 16, auto-generating thousands of SEO-optimized pages for matches, leagues, countries and betting markets from live data. Implemented programmatic SEO across the site — server-side/ISR rendering, JSON-LD structured data (SportsEvent, BreadcrumbList), auto-generated XML sitemaps per page type, canonical URLs and noindex rules for thin pages — so every page is fast, crawlable and search-friendly. Integrated Payload CMS (headless) to power the blog, configuring content collections, a draft-and-publish workflow, a rich-text editor and media uploads on a dedicated database, and built the public blog and article pages that render CMS content with near-instant publishing via ISR revalidation. Added server-side free/premium content gating and Redis caching for performance and graceful degradation.

AI-Powered Virtual Receptionist System

07/2025 – 06/2026

AI Voice Receptionist with Smart Escalation & Support Ticketing

Built a full-stack AI-powered Virtual Receptionist System for SmartCaller that autonomously handles all incoming calls 24/7, resolves user queries in real time, and shares relevant information to the caller's email on request. When an agent cannot resolve a query, the system seamlessly transfers the call to a human agent. If no human agent is available, it collects the caller's details and issue summary, then automatically forwards a complete support ticket—including the full call transcript and user query—to the support team for follow-up. Integrated ElevenLabs for natural voice synthesis to deliver a human-like caller experience.

Digital Language Assessment Platform

10/2024 – 06/2025

Teacher-Student Interactive Assessment Platform with Real-time Feedback

Built a comprehensive MERN stack web application for Japanese and Chinese language learning, supporting dual roles for teachers and students. Delivered real-time feedback mechanisms, assessment management tools, and interactive exercises, then completed and handed over the platform to the client.
